

## TECHNICAL SKILLS

---

**Languages:** Java, JavaScript, TypeScript, SQL, Python (Basic)  
**Frontend:** React.js, Tailwind CSS, ShadCN UI, HTML5, CSS3  
**Backend:** Node.js, Express.js, REST APIs, Authentication, JWT  
**Database:** MySQL, MongoDB, PostgreSQL, Supabase  
**Tools:** AWS(Basic), GitHub, Docker, Postman, Render, Zapier, CloudFlare (Tunnel, DNS)  
**ML Tools:** Scikit-learn, Matplotlib, Jupyter, Kaggle, Hugging Face, RAG PipeLines

## WORK EXPERIENCE

---

### SoftPro India

Software Development Intern

—Sep 2024 – Dec 2024

- Developed and maintained responsive web applications using HTML, CSS, JavaScript, React.js, Node.js, and MongoDB.
- Integrated RESTful APIs and optimized backend processes for improved performance.
- Enhanced backend efficiency by **optimizing database queries** and API logic for faster response times and reduced cloud resource consumption.

## TECHNICAL PROJECTS

---

### Reneo – Full-Stack Live Commerce Platform

React, TypeScript, Node.js, Express, Agora WebRTC, Supabase

Live at: [Reneo](#) | [GitHub: /reneo](#)

Jan 2026 – Feb 2026

- Architected a full-stack live commerce platform using **React 18, TypeScript, Node.js, and Express**, enabling sellers to broadcast live streams and interact with customers in real time.
- Integrated **Agora WebRTC RTC SDK** with **backend-signed cryptographic token generation** for secure, ultra-low latency video streaming and strict **publisher vs. subscriber role segregation**.
- Implemented a dual-layer real-time engine using **Supabase Broadcast & Presence** channels, achieving **sub-30ms** live chat, floating emoji reactions, and audience tracking without database write bottlenecks.
- Engineered in-stream **real-time product switching** and cart management backed by **PostgreSQL** with **Row-Level Security (RLS)** policies for multi-tenant data isolation.
- Built an automated test suite with **Vitest** to validate token privilege bitmasks, role authorization guards, and cart calculation boundary limits.

### CreatorAI – AI Content Generation Platform

Next.js, React, TypeScript, Convex, Gemini API, Clerk, ImageKit

Live at: [creatorai.siddpatel.com](#) | [GitHub: /creatorAI](#)

Oct 2025 – Nov 2025

- Built a scalable AI content generation SaaS using **Next.js 14, TypeScript, and Convex** serverless backend with real-time reactive data pipelines.
- Engineered prompt workflows with **Google Gemini API** for automated long-form articles, copy generation, and prompt-to-image workflows.
- Secured application routes and user tiers with **Clerk Authentication** and automated synchronization via backend webhooks.
- Optimized cloud media workflows utilizing **ImageKit and Unsplash REST APIs**, improving image delivery and asset rendering speeds.

## TECHNICAL ACHIEVEMENTS & CODING PROFILES

---

- 3 star (max rating: 1672)** at [GeeksForGeeks](#), solved different data structure problems
- 300+ problems** solved on [LeetCode](#) and [CodeForces](#) 🔗.
- Built an AI-powered Discord chatbot** at the Code Slush Hackathon ([Credential Link](#))
- AWS Gen AI Certification** : ([Certificate Link](#) )

## EDUCATION

---

### Bundelkhand Institute of Engineering and Technology

Bachelor of Technology in Computer Science & Engg, **GPA: 7.57**

Jhansi, UP

Sep 2023 – May 2026

### Govt. Polytechnic Meerut

Diploma, **Percentage: 73**

Meerut, UP

Aug 2019 – Jun 2022

## SOFT SKILLS

---

- Communication, Teamwork/Collaboration, Leadership, Problem-Solving, Adaptability
